

Practica MR entre Ambientes

para crear el MR de activity hacia qa, primero se ejecuta el comando git fetch que trae las actualizaciones del remoto sin modificar el código local, luego con git rebase origin/qa es para poner cambios de activity enima de los últimos de qa, así se evita conflictos.

Cuando la rama esta lista, se sube con git push -u origin activity, el -u vincula la rama local con la remota para próximos push y pulls mas simples.

```
darwi@darwin MINGW64 ~/Desktop/ADS0-2899747--Darwin-Cuellar-Morales (activity)
$ git status
On branch activity
Your branch is up to date with 'origin/activity'.

nothing to commit, working tree clean

darwi@darwin MINGW64 ~/Desktop/ADS0-2899747--Darwin-Cuellar-Morales (activity)
$ git fetch

darwi@darwin MINGW64 ~/Desktop/ADS0-2899747--Darwin-Cuellar-Morales (activity)
$ git rebase origin/qa
Current branch activity is up to date.

darwi@darwin MINGW64 ~/Desktop/ADS0-2899747--Darwin-Cuellar-Morales (activity)
$ git push -u origin activity
Everything up-to-date
branch 'activity' set up to track 'origin/activity'.

darwi@darwin MINGW64 ~/Desktop/ADS0-2899747--Darwin-Cuellar-Morales (activity)
$ |
```

Luego en la plataforma GitHub se crea un merge request con base = qa y compare = activity, después de crearlo se agrega un título y una breve descripción sobre los cambios

Comparing changes

Choose two branches to see what's changed or to start a new pull request. If you need to, you can also [compare across forks](#) or [learn more about diff comparisons](#).

base: qa ← compare: activity

[GitHub Community Guidelines](#)

Al enviar el MR pasa a revisión y si se aprueba, el contenido de activity se fusiona con qa, dejando esto listo para hacer pruebas antes de pasar a main o producción.

Merge pull request #1 from Darwin-9/activity

Extended description

MR: cambios de activity a qa

This commit will be authored by darwincuellararmorales.2006@gmail.com.

[Confirm merge](#) [Cancel](#)

Al final, se cambia la rama actual que era activity a la rama qa con git checkout qa, luego con git pull origin qa descarga los cambios de la rama qa que están en el repositorio remoto

```

darwi@darwin MINGW64 ~/Desktop/ADSO-2899747--Darwin-Cuellar-Morales (activity)
$ git checkout qa
Switched to a new branch 'qa'
branch 'qa' set up to track 'origin/qa'.

darwi@darwin MINGW64 ~/Desktop/ADSO-2899747--Darwin-Cuellar-Morales (qa)
$ git pull origin qa
